— WHO WE ARE

About MIS Solution

MIS Solution is a full-spectrum technology partner delivering everything from IT hardware and e-commerce to enterprise infrastructure and managed support. From concept to deployment and beyond, we build lasting digital infrastructure that helps businesses grow.

◆ What We Do

We combine a complete IT product catalog with three specialized service divisions — Digital Services, Business & Corporate Solutions, and Maintenance & Support — to cover the full technology lifecycle of any organization.

◆ Who We Serve

Enterprises, SMEs, government bodies, and startups across finance, e-commerce, telecom, healthcare, education, retail, logistics, manufacturing and more.

◆ How We Work

A proven methodology — Assessment & Planning, Design & Prototyping, Development & Deployment, and ongoing Support & Optimization.

◆ Why Choose Us

Proven expertise, 24/7 availability, tailored solutions, and scalable architecture — backed by transparent warranty and rapid response support.

— WHAT WE OFFER

Core IT Solutions

Three specialized divisions — each a full-spectrum capability center designed to scale with your enterprise.

1

Digital Services

Build your complete digital presence.

● Website Design & Development

Modern responsive websites with SEO-friendly structure and conversion-focused design.

● Web Domain & Hosting

Domain setup, DNS, secure hosting, SSL, and performance optimization for reliable uptime.

● Domain Registration

Local and international domain registration and renewal support to secure your brand.

● Digital Marketing

SEO, social campaigns, and paid ads to increase leads, visibility, and online revenue.

● Mobile App Development

● AI Development & Integration

Custom Android & iOS apps integrated with your existing systems.

Chatbots, predictive analytics, NLP, computer vision, and intelligent automation.

2

Business & Corporate Solutions

Enterprise-grade B2B infrastructure & deployments.

- **Data Center Solution**

End-to-end enterprise data center design and deployment.

- **Structured Cabling**

Reliable structured cabling for modern enterprise infrastructure.

- **CCTV / IP Camera Surveillance**

Scalable surveillance architecture for corporate security.

- **Networking Infrastructure**

Routers, switches, firewalls, and enterprise network accessories.

- **Power Solutions**

UPS, batteries, and monitoring systems for uninterrupted operations.

- **Corporate ID Card Printing**

Bulk professional printing support for enterprise operations.

3

Maintenance & Support

Keep your IT running at peak performance.

- Yearly IT Maintenance Contract**

Annual coverage for preventive checks, monitoring, upgrades, and support response.

- On-call Repairs & Troubleshooting**

Fast-response repair support for desktops, servers, network devices, and office systems.

- Project Basis Installation & Delivery**

Project-based setup and commissioning for IT hardware, network, and corporate rollouts.

- What Our Support Covers**

Desktops, servers & storage, network switches, printers, CCTV, UPS, software/OS, and data backup & recovery.

HOW WE DELIVER

Our Methodology

01

Assessment & Planning

Understand needs, scope, and goals.

02

Design & Prototyping

Architect the right solution.

03

Development & Deployment

Build, test, and roll out.

04

Support & Optimization

Maintain and continuously improve.
